

Boost Your Benefits

Enjoy added coverage for certain medical conditions

The health of your teeth and gums is part of a bigger picture: your overall wellness. Gum disease is associated with a number of systemic conditions, and people with certain chronic conditions may benefit from additional periodontal (gum) cleanings. That's why your dental plan offers expanded coverage if you have been diagnosed with **diabetes, heart disease, HIV/AIDS, rheumatoid arthritis** or **stroke**.

Here's how opting into this expanded coverage will help you¹:

Standard Coverage

100% coverage for one periodontal scaling and root planing procedure per quadrant (D4341 or D4342) **every second calendar year**

Two of the following (any combination) per calendar year:

- prophylaxis (teeth cleaning) (D1110 or D1120), **covered at 100%**
- periodontal maintenance procedure (D4910), **covered at 90%**
- scaling in presence of moderate or severe gingival inflammation (D4346), **covered at 90%**

SmileWay[®] Wellness Benefits
